

THE STRIPPER™

SPRAY MAINTENANCE SYSTEM

An effective preventive maintenance system right at your fingertips.

Galvanizing build-up is bad for roll forming equipment, production efficiency, and profits. The Stripper is a degalvanizing agent that strips your machine of messy build up. It sprays on red for easy visibility. Simply Spray it on rollers of forming machines and press dies and the special ingredients get right to work releasing and removing galvanized build up. Then high quality lubricants take over to keep precision machines running smoothly...at peak efficiency... day in, day out.

Ordering Information

Item #	Code	Description	Quantity	Weight per carton (lbs.)
27147	Stripper	Cleaner & Lubricating Spray	12 per ctn.	14

Here's How:

1. Spray The Stripper at those points where galvanizing tends to build up on your machines. The special cleaning ingredients get right to work softening up deposits.

2. Under normal conditions, galvanizing build-up will loosen and flake off by itself after being sprayed with The Stripper. Then if required, remaining build-up can easily be removed by light scraping.

3. High Quality Lubricants then take over to keep precision machines running smoothly.
