

Rectangular Opposed Blade Cable Operated Damper

Internal Mounted Cable

Cable operated dampers are the most convenient and economical way to balance air flow through the face of a diffuser. The damper is inserted into a slot in the side of the duct upstream of the diffuser. The air flow is adjusted by simply pushing or pulling on the core wire which changes the damper blade position. Once the adjustment has been made, it is locked by tightening the set screw nearest to the looped end.

Features

- Available with cable lengths of up to 15'
- Opposed blade action
- Rigid extruded aluminum frame

Looped end of adjustment cable with two set screws
