

CDMF110

Duro Dyne introduced the CDMF110, a new compact pinspotter with greater power and versatility that is powered by a single 110 volt power source! Special design welding capacitors allow the CDMF110 to deliver more power, precisely timed to the welding tip. The new CDMF110 will weld pins from 1/2 inch to 4 inches long on steel from 26 to 16 gauge. It is designed for use with both internal duct liner as well as external foil faced duct wrap. Proven solid-state weld control circuitry guarantees years of reliable, trouble-free service in your shop.

For use on internal duct liner as well as external foil faced duct wrap
